### 10-Year Educational and Facility Master Plan

## General Overview

The Facility Master Plan (FMP) will provide a strategic framework for institutional reforms and capital investments for Boston Public Schools facilities. The focus of the FMP will be to illustrate capital planning opportunities based on

# FAQ

**Q: HOW IS THE STUDY CONDUCTED?**

A: The consultant team will assess each building, looking at how well the facilities support the educational programs and the standards for each type of space. It will also include whether each facility provides adequate infrastructure for current/future technology and outside spaces—including fields, parking, traffic, and signage—as well as a review of school safety.

**Q: WHEN WILL THE ASSESSMENTS TAKE PLACE?**

A: The Facility Educational Adequacy Assessments will be conducted during the winter of the 2015-2016 school year. The Facility Conditions Assessments will occur in the summer of 2016.

**Q: WHAT BENEFITS COME FROM THE FACILITY ASSESSMENTS?**

A: All data collected to complete the assessments will be used as critical pieces of information to develop the overall 10-year Facility Master Plan. The focus of the FMP will be to illustrate planning opportunities based on the needs of each school's educational framework with the conditions of the facilities that exist. In other words, the plan will provide a roadmap to address facility deficiencies and make informed capital improvement decisions.
